Don Bryant gave input regards to the availability of sufficient utility options at the proposed location. Bill Caton gave a brief overview of the tax credit project. There was lengthy discussion. The application is due by February 1. Results should be known by May. If approved May through September would be dedicated to the change in zoning of the property with construction anticipated to begin in September October with a completion date of June or July 2015. There was discussion about how the multi-site/multicounty plan could help improve our chances of getting the tax credits. The proposal includes two buildings in Williamsburg, two in Melvern, four in Lyndon, six in Osage City, four in Burlingame, two in Harveyville, and either two or four here. A demographic study may be necessary for our portion. This may also include some LMI data. The rents will be in the \$450-\$550 range, they are required to accept section 8 vouchers so they believe it will have a limited overlap on our Overbrook Housing Authority clientele. These properties would be on the property tax roll. The building permit was discussed next. Don Bryant believes that the infrastructure is in place to support. There is no meter there now. The building permit would be approximately \$300 per unit based off of \$300,000 estimated per-unit cost. The proposed resolution was read with discussion following. Are the financial considerations of the permits part of the resolution? Mr. Caton believes that this is a figure that can be indicated at a point later in the process. Mr. Caton also indicated this is a very competitive program historically for every dollar that has been awarded, four dollars worth of applications were received.
